

Introducing the MMM-2010U Mounting System for the Apple Mac Mini (Mid 2010, Aluminum Unibody Design)

Provides the ability to mount and secure the Apple Mac Mini to the back of a monitor, underside of a desktop, shelf, or to the wall. May also be used as a stand to store the Mac Mini under the monitor.

Mounting System for Apple Mac Mini Aluminum Unibody Models

The **MMM-2010U** is a custom mounting and security bracket designed specifically for the Apple Mac Mini and Mac Mini Server aluminum unibody models, which became available in mid 2010. This mount kit will also mount and secure the Apple Time Capsule.

- Steel construction with a durable powder coat finish that prevents scratches. Foam pads included for additional protection and a snug fit.
- Holes provided to secure with a standard pad lock. Lock can be positioned in front or back (lock not included).
- Open-frame design does not interfere with WiFi and Bluetooth operation. Also allows for optional positioning of the Mac Mini to access internal components while the computer remains mounted.
- Simple installation with mounting hardware included. Hardware kit includes: (4) 3/16" x 1" Wood Screws and (4) 3/16" Wall Anchors; (4) 3/16" x 3/4" Wood Screws; (4) M4 x 12mm Screws with Lock Washers for VESA 100 mount.
- 100% Proudly Made in the USA. Made in Michigan.

How do you mount the Apple Mac Mini to the back of a monitor? VESA mounting holes on the back of many LCD monitors provide the option to attach the MMM-2010U.
